

Monthly Retail Sales Trend Analysis

R Markdown Tiny Project

Author: Sayooj Sathiyar T

Enrollment No.: 2505101270260

1. Introduction

This project analyses monthly retail sales using R. It covers importing, preprocessing, statistical exploration, visualization, interpretation, findings and conclusion.

2. Statistical Results

Measure	Value
Months	24
Total sales	1,415,800
Mean sales	58,991.67
Median sales	58,400.00
SD of sales	11,113.72
Mean customers	693.33
Advertising–sales correlation	0.999
Customer–sales correlation	1.000
Total returns	1051

3. Graphs

4. Findings and Conclusion

The 24-month dataset shows increasing sales and customer counts. Average monthly sales are 58,991.67, and the advertising–sales correlation is 0.999. The project demonstrates the complete R workflow required for a Tiny Project. Correlation indicates association rather than causation.
